

## **Electronics Test Technician**

Digital Dynamics, Inc. (DDI) is growing and has a career opportunity for a Electronics Test Technician. Our company designs and manufactures real-time network-based machine and process controllers, which its customers incorporate into their products deployed worldwide. DDI products employ state of the art in hardware, firmware, and software engineering.

DDI, founded in 1977, is headquartered in Scotts Valley, CA, about 20 minutes south of Silicon Valley. DDI is an employee-owned (ESOP) company where employees share ownership of the company. Our employees describe the company as a collaborative environment with a small company feel in a great location.

The position will be full-time, with a competitive benefits package.

### **Role Responsibilities**

As an Electronics Test Technician you will be responsible for:

- Troubleshooting electro-mechanical assemblies to the component level.
- Develop and document test processes for electronic equipment.
- Perform minor soldering and electronic repair.
- Design and document minor electronics and cable assemblies.
- Utilize various electronic test equipment, such as meters, oscilloscopes, and power supplies.

### **Requirements**

The successful candidate will possess an AS degree in electronics or equivalent.
